📍 Cairo, Egypt (Open to relocation)

PROFILE

Backend engineer with 2+ years of production experience in PHP and Laravel, focused on system design, refactoring, and payment flows. I enjoy turning complex requirements into clean, reliable systems and improving existing ones.

PROFESSIONAL EXPERIENCE

OAF Programmer 🌐, Backend Engineer

2025 May – present
Banha, Egypt

- Built complete backends solo for multiple client platforms, including a live multi-role system serving four role dashboards from a single API.
- Delivered backends for products across education, e-commerce, and services, from data modeling and business logic to API design.
- Refactored legacy codebases into modular, maintainable architectures, reducing bugs and improving performance.

Code7x (Freelance, Part-time), Backend Engineer

2025 Dec – 2026 Jun
Mansoura, Egypt

- Resolved production issues across 6 custom-built client websites and systems.
- Diagnosed severe slowness on a research publishing platform hosting a large library of books and papers; traced it to inefficient SQL queries and optimized them, significantly improving page load times.
- Collaborated with the SEO team to implement technical SEO requirements and fixed frontend issues affecting performance and search visibility.

Fikra, Back-end Developer

2024 Jul – 2025 Apr
Mansoura, Egypt

- Handled backend development with Laravel in a small product team, integrating MyFatoorah payments and SMS/email notifications.
- Joined client meetings to understand requirements and help turn them into technical tasks.

PROJECTS

gulf/payments, Open-source Laravel payment orchestration package (in active development)

- Personal project, started after seeing payment flows rebuilt from scratch across multiple projects.
- Unified API over 10 payment gateways (Stripe, Paymob, MyFatoorah, Tabby, Tamara, Tap, PayTabs, Amazon Payment Services, Fawry, PayPal); adding a new gateway takes one driver class and one config block.

- Composable payment flows: pay now, authorize and capture, deposit with deferred balance, hosted checkout, and recurring billing.
- Designed for correctness: idempotency keys, signature-verified and out-of-order-safe webhooks, and a payment state machine that dispatches events only after the database commit.
- Includes a testing fake, a gateway conformance test suite, and PHPStan static analysis.

SKILLS

- **Backend:** PHP, Laravel, REST API design, Multi-tenant architecture, Role-based access control, Multi-language (Arabic / English)
- **Architecture:** Service & Repository pattern, Modular architecture, Actions & DTOs
- **Laravel Ecosystem:** Filament, Livewire, Queues & Jobs, Task Scheduling, Realtime (Reverb, Pusher), Telescope, Horizon
- **Security & Auth:** Sanctum, Passport, JWT, Social login (OAuth), OTP / Multi-factor authentication, Rate limiting
- **Payments:** Payment gateway integration (10 gateways incl. Stripe, Paymob, MyFatoorah, Tabby, Tamara), Webhooks, Idempotency
- **Integrations:** Google Maps & Places APIs, SMS & WhatsApp providers, Excel / PDF import & export
- **Performance & Quality:** Legacy code refactoring, MySQL query optimization, DB transactions & locking, Redis caching, Profiling (Xdebug, Debugbar), Technical SEO
- **Cloud & DevOps:** AWS (S3, SQS, Lambda), GitHub Actions (automated deployment)
- **Ways of Working:** Technical documentation, Agile (Jira, Sprints)
- **AI-assisted Development:** Claude, ChatGPT, Google Antigravity, Kimi, for frontend delivery and test writing
- **Familiar with:** Java (fundamentals), MongoDB, Firebase, Neo4j, Domain-Driven Design (currently learning)

EDUCATION

B.Sc. in Computer Science,

2020 – 2024

Faculty of Computers and Information, Mansoura University

- Graduation project (grade: Excellent): Laravel-based learning platform with gamification and mentor booking.

COURSES

Backend Development Course, CCIC, Mansoura University

2024 Jul – 2024 Oct

Completed a backend development program at CCIC, Mansoura University, focusing on PHP, MySQL, and Laravel, with hands-on experience in dynamic web applications.

PHP course  , *Linkedin learning*

Object-Oriented Programming  , *LinkedIn learning*

Advanced Laravel  , *Linkedin learning*

Transact SQL queries using SQL server  , *maharatech*

LANGUAGES

- **Arabic:** (Native)
- **English:** (Intermediate)

INTERESTS

- Software architecture: exploring system design patterns such as DDD and modular and hexagonal architecture, and how they keep large systems maintainable.
- Fintech and payment systems: designing payment flows that stay correct and reliable, from gateway integration to webhook handling.
- Software quality: testing, code review, and performance optimization to catch problems before they reach production.
